## H+I Adventures Launch New Biking Adventure To Chile And Patagonia

Posted by: BBMLIVE | February 18, 2016 | 0

**Sweep down active volcanoes, crest high Andean passes and scale the granite in Torres del Paine on this incredible 12-day biking adventure.**

Award-winning mountain biking experts H+I Adventures have launched a new two-wheel odyssey that ventures along the trail of southern giants in Chile and Patagonia. The twelve-day bike tour features sublime singletrack through bamboo and native araucaria trees and trail riding across an incredible, moonscape of petrified lava and up snow-covered volcanoes. An adventure that goes beyond the bike,

intermediate riders spend 7 days exploring Chile's beautiful lakes and volcanoes, paddling between aquamarine icebergs, sharing meals with indigenous Mapuche people, and then 4 days exploring Patagonia by foot and kayak, and hiking to view the famous Torres del Paine peaks that dominate the Chilean skyline.

H+I Adventures is known for its seamless blend of exceptional mountain biking with local cultural experiences. Mountain bikers will visit a Mapuche community to learn about their cultural customs and enjoy a delicious meal around a fire. A traditional asado (Latin American BBQ) on the shores of Lake Petrohue is also included in the trip. The new bike tour features a variety of unique accommodation, from lakeside lodges and cosy domes in Patagonia to woodland cabins and traditional, family-run hotels.

The tour debuts this November and is the eleventh destination added to H+I's collection of world-class bike adventures. For more information, visit [www.mountainbikeworldwide.com](http://www.mountainbikeworldwide.com) or call 1-888-228-5035.
